ZelEn

In line with our strong dedication in caring for the environment and the community, and striving for sustainable development, Končar D&ST is a proud customer of the product ZelEn of HEP Opskrbe (Croatian Electric Supply). In our operations, we exclusively use electrical energy produced from sustainable energy sources.

The electrical energy used by ZelEn customers is obtained exclusively from renewable sources, and this is proven by the cancellation of a sufficient number of guarantees of origin in the Guarantees of Energy Origin Register, kept by the Croatian Energy Market Operator (HROTE).

Through our socially responsible operations, we are contributing to reducing overall CO₂ levels, helping to conserve the environment, and further stimulating the generation of energy from renewable sources.
